

# CONTENTS

## REGULARS

### 06 EYE OPENER

Fascinating images from around the world.

### 12 CONVERSATION

This month's letters and emails from our readers.

### 15 DISCOVERIES

This month's science news: world-first study maps how the brain changes as we age; DNA study offers clues about cancer mutations; humans selectively bred dogs to have puppy-dog eyes; wider genetic testing could be on the horizon; Pluto's weird landscape may have been shaped by ice volcanoes.

### 30 REALITY CHECK

The science behind the headlines. Is peat-free compost bad for the environment, and what are the alternatives? Does microbiome-friendly skincare work? Is the W boson about to rewrite physics?

### 42 SUBSCRIBE TODAY!

### 36 INNOVATIONS

The latest tech and gadgets news.

### 65 MICHAEL MOSLEY

Beetroot – that much-maligned vegetable – can supercharge your athletic performance and boost your heart health. Better start forcing it down...

### 66 ALEKS KROTOSKI

Why to-do lists are better than search engines.

### 79 Q&A

Our experts answer this month's tricky questions. If I fell out of a commercial aircraft, would I be dead before I hit the ground? I regularly worm my pets, should I worm myself, too? How often should I reboot my computer? Why do trees have such shallow root systems? How do tearless onions work? Can a vasectomy be reversed? Do dogs know when they fart? What is sleep inertia? What is ball lightning? Why do kids get hyperactive when it's windy?

### 88 CROSSWORD

Our tricky crossword is like a gym for your brain!

### 88 NEXT MONTH

See what's coming up in the next issue of BBC Science Focus.

### 90 POPCORN SCIENCE

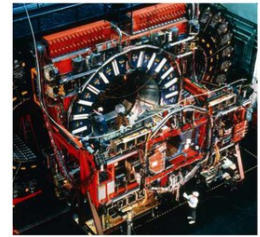

Is it possible to build a lightsaber, just like Obi-Wan Kenobi's?

### 15 DISCOVERIES

Huge human brain study maps the organ between our ears, to reveal clues about how we age.

### 34 REALITY CHECK

Is the W boson, a subatomic particle, about to break physics as we know it?
