Mission Statement: Journal of Paramedic Practice (JPP) is the only monthly peer-reviewed and evidence-based journal for the paramedic profession.

JPP provides the latest practical, clinical and professional information for all paramedics, including emergency care practitioners and assistants, medical technicians, critical care paramedics, combat medical technicians, and members of voluntary aid societies. JPP has a team of consultant editors with a strong commitment to paramedic sciences, as well as a prestigious editorial board that represents different strands of the profession.

JPP will help you update your knowledge in important areas of practice and ultimately deliver the best possible care to your patients. JPP also offers free online CPD modules for all subscribers, allowing you to fulfil your CPD requirements at a time suited to you.
