ALEX LAMB

Exodus

Humanity has been overrun, and has surrendered Earth. The enemy have infected us. The end is near . . .

The Photurians – a hivemind of sentient AIs and machines – were awakened by humanity as part of a complex political trap. But they broke free, evolved, and now the end of humanity has come.

But on a distant planet shielded from both humanity and the Photurians, one hope may still live. The only person who might be able to intervene. The roboter. And so a desperate rescue mission is begun. But can he be reached in time? Or will he be the last remnant of humanity in the universe?

Alex Lamb splits his time between writing science fiction, software engineering, teaching improvised theater, running business communication skills workshops, and conducting complex systems research.

ANDRZEJ SAPKOWSKI

The Lady of the Lake

Geralt returns in the final volume of the Witcher saga! The inspiration behind the bestselling Witcher video games.

After entering the Tower of Swallows while narrowly escaping death, Ciri finds herself in a completely different world . . . an Elven one. She is trapped with no way out. Time does not seem to exist and there is no way to cross back into her home world.

But this is Ciri, the child of prophecy, and she will not be defeated. She knows she must escape, and also conquer her worst nightmare. Leo Bonhart, the man who chased, wounded and tortured her, is still on her trail.

Andrzej Sapkowski was born in 1948 in Poland. He studied economy and business, but the success of the Witcher series made him one of Poland's most famous and successful authors.
