Contents

281 The use of modern dressings in managing split-thickness skin graft donor sites: a single-centre randomised controlled trial
Comparison of wound healing rate, pain severity duration and dressing change frequency in four randomised patient groups. M. Kazamavičius, A. Cepas, V. Kolaityte, R. Simioniuniene, R. Rūmiliški

292 The health economic burden that acute and chronic wounds impose on an average clinical commissioning group/health board in the UK
A sub-analysis of a retrospective cohort analysis of the records of 2000 patients in the THIN database. J.E. Guest, K. Powden, P. Powden

304 Pressure ulcers prevention efficacy of an alternating pressure air mattress in elderly patients: EMTAO a randomised study
The authors primary endpoint was the appearance of pressure ulcers over a 30-day monitoring period. P. Sauvage, M. Touillet, C. Prudere, F. Portalier, J-M Michel, P. Charny, Y. Passardori, R. Fevrier, A-M. Hallet-Lezy, F. Beauchêne, B. Scherer

314 Management of Fournier’s gangrene non-healing wounds by autologous skin micrograft biotechnology: a new technique
The case of a 40-year-old male with Fournier’s gangrene, due to a rectal microperforation following diarrhoea. M.A. Bocchini, P. Bogotti, A. Purisi, F. Rivaurosa, A. Prinetti, E.A. Baglioni

319 Efficacy of arginine-enriched enteral formulas for the healing of pressure ulcers: a systematic review
This review analysed seven RCTs with 369 patients, identified following an extensive database search. P. Liu, W-Q Shen, H-L Chen

324 The impact of the multidisciplinary team in the management of individuals with diabetic foot ulcers: a systematic review
Following a search, 19 papers were identified. Data were extracted using a bespoke extraction tool and quality appraisal was undertaken using the EBL Critical Appraisal checklist. A. Bugby, Z. Moore

342 Use of an epidermal growth factor-infused foam dressing in a complicated case of Adams-Oliver syndrome
A case of a 4-year-old child with Adams-Oliver syndrome and complex cranial defect with exposed titanium mesh. B. Szegh, S. Sibor, K. Fajdekicikova, A. Senan, H. Emmertz, K. Baykaner, S. Ozmen

346 Exudates absorption and proteases trapping in venous leg ulcers
The authors tested absorption using an artificial exudate-like fluid, over 90 minutes and the protein-trapping ability using ELISA assays. P. Humbert, C. Courderot-Massier, S. Robin, D. Oster, R. Peggah

279 Editorial: Waiting for change K. Ousey, R. Webb

350 Conference report: Chronic venous disease and wound infection: approaches, prevention and outcome measures from EWMWA C. Fronzo

353 Letters: Response to comment on ‘Nurses’ practice in preventing postoperative wound infections: an observational study’. E. Lin, A. Marshall, S. Ding, B.M. Gillespie

353 Letters: Comment on Guest et al. “The health economic burden that acute and chronic wounds impose on an average clinical commissioning group/health board in the UK”. R. White, G. Smerdon, A. Bishop, S. Witts, J. Reeves, C. Ashford
