

Bathroom showcase

Created for Bette by industrial designer Jochen Schmiddem, the asymmetrical Bettepool Oval bath has generous proportions and allows for a deep, relaxing soak. It has an innovative inclined overflow to allow a higher water level. Made from enamel-coated titanium steel, the bath can be used freestanding, or built neatly into a corner to save space. L1640×W960×D450mm, with an internal lying area of 1215mm. From £1,552. 01225 335 111 | www.ripples.ltd.uk

Design tip: Ease of cleaning is important for bathrooms, so look out for ceramic and glass coatings that make maintenance easier. Here the bath has BetteGlaze enamel, which is so smooth that dirt cannot adhere and water runs off, so reducing limescale residue.
