6 > Your fund choices for a £10,000 annual income

After two successful years of meeting the income challenge using Rated Funds, we present two new portfolios for income-seeking investors

8 > Find the right balance of funds for your risk profile

We ask the experts for asset allocation guidance and Rated Fund portfolio suggestions for three different risk profiles

12 > Why inflation dominates investment thinking

As growth returns to the major economies and interest rates tick higher in the US, we look at ways to benefit from inflation's resurgence

14 > What you need to know about Rated Funds

Alongside past performance, investors should pick funds that match their personal investment aims, and Rated Funds provide tailored selections

17 > Funds, trusts and ETFs: which will suit you best?

Rated Funds included unit trusts, closed-ended investment trusts and index-trackers. Here we explain the benefits and weaknesses of each, and why you might choose one type over another

Money Observer's thrice-weekly email newsletter can alert you to updated analysis of Rated Funds. Sign up at moneyobserver.com/e-update.
