PEUGEOT

PEUGEOT RECOMMENDS TOTAL Official Fuel Consumption in MPG (l/100km) and CO₂ emissions (g/km) for the all-new PEUGEOT 508 SW range are: Combined 36.3 (7.8) – 59.8 (4.7) and CO₂ 132 – 101 g/km.

The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP*) used to measure fuel consumption and CO₂ figures. The fuel consumption figures shown in this advert are calculated under the WLTP test. The CO₂ figures shown are NEDC equivalent (NEDCeq), calculated using EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC**) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO₂ figures with other vehicles tested using the same technical standard. *WLTP – Worldwide harmonised Light vehicles Test Procedure. **NEDC – New European Driving Cycle. Model shown is an all-new 508 SW GT 1.6L PureTech 225 EAT8 S&S with optional Night Vision. Information correct at time of going to print. ^According to version: standard or cost option.
