

## QINETIQ

Explore the extraordinary,  
every day

Find out more: [qinetiq.com/careers](http://qinetiq.com/careers)

**QinetiQ is a company of scientists and engineers committed to listening, understanding and responding to our customers' needs. This enables us to use our depth of experience, and our unique science and engineering expertise, to equip customers with powerful solutions to their most pressing challenges.**

### Why work for us

We understand that people want diversity from a career, so we've created a flexible working environment, where we offer opportunities to work on different projects and give people the freedom to innovate and try new things. Our peoples' depth of expertise and their passion for defence and security makes the critical difference for our customers. We constantly encourage staff to think and do things differently, to always look for enterprising, agile ways to create real benefit. Collaborating with and learning from our world-renowned experts makes QinetiQ an exceptionally rewarding place to work; where no two days are the same.

### Training and development

We encourage our people to challenge themselves, realize their full potential

and to be proud to deliver outstanding performance for our customers. The QinetiQ Academy provides opportunities for further growth, and everyone are encouraged to develop technical skills and complete professional training.

### Graduate schemes

Our two-year Graduate Development Programme gives graduates access to more than 250 rotational placements, unique facilities and a strong support network to help develop their career.

### What we are looking for

We're looking for outstanding technical people, creative and analytical thinkers, decision makers, influencers and excellent communicators. Working at QinetiQ is more than just a job – we're making a difference in addressing some of society's biggest technical challenges. Our purpose is to "save lives, protect sovereign interests, deliver where others can't". This is why we exist and the reason why we all get out of bed in the morning.
