QUANTUM SCIENCE AND NANOMATERIALS
International Graduate School
Strasbourg, France

- Internationally recognised Master of Physics and PhD programme
- Study in English, at the crossroads of Europe and at the forefront of physics, materials science, chemistry and engineering
- Enhanced curriculum in fundamental and applied science:
  - quantum technology
  - subatomic physics
  - nanomaterials
  - nanoscience
  - device engineering and more ...
- Learn-by-doing: courses integrated with individual research projects
- Student-led initiatives, networking, international partnerships ...

qmat.unistra.fr

Shape the future in quantum science and nanotechnology

Applications: February (International) and May (EU students) each year
